Dishwasher FAQs

Q. What aspects/sections of the machine are most prone to failure due to wear/tear parts?

A. The conveyor parts are prone to wear; particularly, the rods that the flights attach to wear down over time. Preventative inspection and maintenance can prevent unexpected downtime due to part failure.

Q. What parts are proprietary and should not be replaced with generics?

A. Hoses and vacuum breakers. Our hoses are steel and braided. Customers sometimes buy vinyl hoses elsewhere and they pay more in costs over time because these don't last as long as steel, braided hoses.

Q. How often do certain parts need to be replaced based on the duty cycle? High, low, medium?

A. Medium-duty parts have a lifecycle of 6 months. Water hardness also affects the recommended replacement frequency.

Q. What are the different use cases depending on the market segment? Is one harsher than the other?

A. High staff turnover customer sites are harsher due to a lack of education/training on equipment operations and care.

Q. What is the value of using genuine OEM parts for commercial dishwashers?

A. The answer is threefold:

1. Worker safety. Consistency of parts can better protect your people.
2. Company liability. If you use third-party parts, it violates the UL certification.
3. Curtains. Non-OEMs have fewer layers/plys and curl more. This results in a loss of heat and sanitization and can even cause chain effects, resulting in machine failure.

Conveyor Type

6-Month Maintenance Kits

Finding The Right Kit for Your Conveyor Dishwasher

When ordering kits that include curtains, know the height of the window where the trays pass through. There are kits for two heights.

- Standard Height = 22" or less
- Higher Than Standard = greater than 22"

Model	Height	Part Number	Description
C44A, C54A	Standard	00-913178-00010	O-Rings, Nozzles, Floats, Curtains
C44A, C54A	Higher Than Standard	00-913178-00025	O-Rings, Nozzles, Floats, Curtains
C44A, C54A	All Heights	00-978900-40016 (curtains not included)	O-Rings, Nozzles, Floats, Vacuum Breaker

Finding The Right Kit with Curtains for Your Flight Type Dishwasher

When ordering kits that include curtains, know the height of the window where the trays pass through. There are kits for two heights.

- Standard Height = 22" or less
- Higher Than Standard = greater than 22"

Also, know:

- Do you have a second 4' wash section? Order an Additional Wash Section Kit
- Prisons: If you have a 'corrections' configuration (safety fasteners, hook-on curtains), order a Correctional Kit so you receive correctional curtains

Model	Height	Part Number	Description

HOBART

WHY
HOBART CURTAINS

Genuine Parts

THE HOBART ADVANTAGE

- 4-ply design maintains heat and saves energy.
- Engineered for an exact fit to prevent splash out and reduce spray.
- Prevents cross-contamination between wash and rinse zone.
- Reduces water spillage on the floor.
- Helps maintain minimum NSF wash and rinse temperatures.
- Minimizes consumption and costs of water and chemicals by reducing water loss.
- NSF certified.

For access to the industry's largest inventory of OEM parts, specifically designed for your equipment call **877-333-1863,** or visit **HobartParts.com**

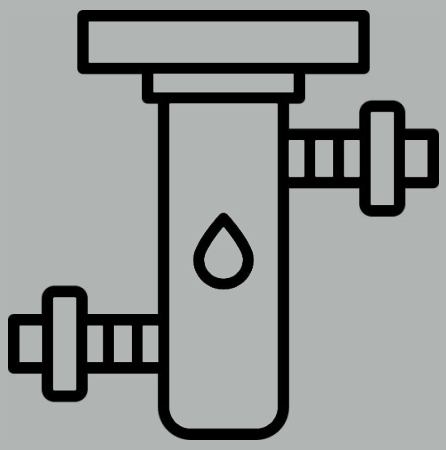
Note: Before servicing any equipment or utilizing the materials provided within this catalog, thoroughly review your product´s safety and instruction documentation; strict adherence to all aspects is required.

All equipment referenced in this catalog must be operated, maintained, and serviced by qualified professionals. Please review your product´s warranty statement before performing any service or repairs, as improper use may void the warranty.



Water Softeners

Continued ▶

Hobart water softeners eliminate water hardness, offering reliable scale prevention and corrosion control in one convenient system. Less scale and corrosion mean your equipment runs cleaner, performs better, and requires less maintenance. As a result, our systems are the ideal solution for reducing costs and maximizing the life and efficiency of your equipment. For added convenience, our units include a salt alarm to remind you when it's time to refill.

HydroBlend

The SS-XL and SS-EXL ScaleStick™, housed in High-Temp Translucent Filter Housings, deliver superior mineral scale prevention and corrosion control. The specially designed cartridge dispenses HydroBlend™ steadily, ensuring consistent scale prevention and corrosion control for predictable durations. No electricity, maintenance, or guesswork is required.

SS-XL ScaleStick™

Part Number: 01-234301-89800
Connection Size: 3/4"
Application: UNDERCOUNTER WAREWASH EQUIPMENT
Model: WTSBSS-XL

SS-EXT ScaleStick™

Part Number: 01-234301-90000
Connection Size: 3/4"
Application: C-LINE, AM, F-TYPE WAREWASH EQUIPMENT
Model: WTSBSS-EXT

High Temp Prefilter

A high-temperature pre-filter traps sand, silt, turbidity, and other unwanted particles. Installing a high-temperature pre-filter before your water softener helps extend the life of the softener resin.

Name: Hobart High Temp Prefilter
Part Number: 01-234202-02800
Connection Size: 3/4"
Application: Hot Water Point of Use Application
Model: Prefilter

Replacement Cartridges

01-234404-13100	SD-510HT	10" High-Temperature Sediment Filter

HydroBlend™ Twin System

The HydroBlend™ Twin System uses ScaleStick cartridges, compatible with any standard 10-inch filter housing, and leverages proven filtration technology. The NSF-approved HydroBlend™ works with non-potable and potable water supplies. Its flexible design allows easy conversion from 10" to 16" sediment or carbon block filtration.

Name: Hobart HydroBlend™ Twin System
Part Number: 01-234301-77200
Connection Size: 3/4"
Application: Steamer/Combi/Proofer/Rack & Deck Ovens
Model: WTSBSS-XLT16

ScaleBlocker® Hollow Carbon Filter System

SMF600 Filter System

Part Number: 00-857487-00001
Connection Size: 3/4"in
Application: Boiler and Generator Base Steamers/Proofers and Combi Systems
Model: SMF600

SMF620 Filter System

Part Number: 00-857487-00002
Connection Size: 3/4"
Application: Boiler and Generator Base Steamers/Proofers and Combi Systems
Model: SMF620

The NSF-rated Hollow Carbon filtration system reduces impurities, including chloramines, chlorine, sediment, bad tastes, odors, organic compounds, tannins, and trihalomethanes. The ScaleBlocker™ Nano crystal scale reduction technology reduces the need for deliming. The Quick-Change cartridge allows for tool-free replacement.

VULCAN

EXTEND THE LIFE OF YOUR EQUIPMENT WITH
VULCAN SCALEBLOCKER® WATER SYSTEM

ScaleBlocker® is recommended for steamers to help minimize limescale buildup and corrosion, which can significantly impact the operation of your equipment, resulting in downtime or service calls. It's a safe and economical way to maintain your investment.

- Removes problems from water without harmful chemicals or additives
- Reduces corrosive chemicals such as chloramines, chlorine, and ammonia
- Filters out particulates and controls pH
- Protects the flavor and aroma of foods and your equipment
