**We can tailor turn-key rental options to support your next shutdown, deep clean, or special projects**

**Please contact one of our specialists today!**

Dry ice cleaning offers significant improvement in cleaning times (up to 60%) in comparison to traditional methods, as well as reduction of damage to equipment and resulting scrap product. Dry ice blast cleaning allows for a non-conductive, in-place method to clean parts and even touch-up cleaning is safe and easy.

Contact our specialists for information on renting equipment for your clean-up needs today!
