

# CC20-FW Cylinder Cage

The CC20-FW is designed for secure on-site storage of up to twenty compressed-gas cylinders. The cage is all-steel tube and plate construction including metal screen sides for natural ventilation and visual inventory and inspection. Each section is separated by a firewall segregating your cylinders into two individual compartments. Cylinders are held in place by adjustable chains and the hinged access-door can be locked with a padlock to deter theft and unauthorized access. The complete unit can be moved about the construction site via a crane hoist connected to the top-mounted lifting eyes. There are also four hollow-structural tubes welded to the base for maneuvering by fork-lift truck.

## CC20-FW Specifications

Model	Cylinder Capacity	Load Capacity	Height	Width	Depth	Weight
CC20-FW	Up to 20 cylinders @ 9.5 in. OD X 60 in. high	4500 lbs	79 in. (2006 mm)	50 in. (1270 mm)	50 in. (1270 mm)	950 lbs. (430.9 kg)
