

HIGH-VOLUME AIR COMPRESSOR SYSTEM SERVICES

Preserving Life One Person at a Time

The AIR BOSS™ endless supply of Grade “D” breathing air

Airgas On-Site Safety Services' AIR BOSS™ high-volume breathing air compressor and filter system is a cost-effective alternative for supplying high-volume breathing where extended air volume and capacity are required. AIR BOSS provides hours of safe, reliable breathing air for up to 100 workers at a time while also powering pneumatic tools for confined space use.

With more than 40 years of experience, Airgas On-Site Safety Services is dedicated to providing our clients with quality, safety, and time-saving solutions in the protection of life and property. The AIR BOSS system is part of our continuing commitment to provide you with value-added services, including Safety Training, Turnaround Services, Monitoring Services, Mobile Hydrostatic Testing Services, Fall Protection Services, and Leasing Services.

Airgas On-Site Safety services delivers the resources and expertise of Airgas added to the Oilind Safety heritage you trust.

AIR BOSS™ eliminates costly downtime...for greater efficiency.

Whether you need extended air volume during a plant outage, or simply the ability to provide a breathing air source as far as ¼ mile away, AIR BOSS™ is your perfect choice for safe, reliable breathing air. An inline monitoring system ensures that each person is receiving clean Grade “D” air without having to check individual monitors or other bulky equipment.

- Provides safe, reliable breathing air for up to 100 workers at a time
- Eliminates time lost to breathing air bottle or trailer change outs
- Completely mobile; mounted in a covered trailer
- Set up and in service in less than one hour
- Produces 220 cubic feet of Grade “D” breathing air per minute at 110 to 115 psi outlet pressure and -65° F dew point
- Delivers “chilled” air to improve worker productivity in hot/humid work environments
- Monitors and records O₂, CO, dew point temperature, and air flow
- AIR BOSS can be staged up to 1/4 mile from the work site

Completely mobile...set up and in service within 1 hour

Each of our dedicated trailers comes fully equipped and requires minimal downtime (usually 15-20 minutes a day) for maintenance. The system includes an auxiliary in-plant receiver, or surge tank, for additional back-up air as well as safety stop gaps for high pressure shutdown or low oil shut down. Our certified air technicians provide exceptional on-site service and safety so you can concentrate on your core business.

Safety...and much more.

With an expansive national footprint and an extensive product line, industrial construction specialist expertise, Red-D-Arc® welding rental equipment, complete industrial gas resources and safety training programs, Airgas On-Site Safety Services provides the complete solution for all your safety rescue service, turnaround service and gas supply needs.

Engineering the right solutions for all your safety and turnaround needs.
