

END OF YEAR SPECIAL

10% OFF **BOTX™ XSR COBOT WELDERS**

When you rent, lease or purchase a new BotX XSR system
from now **until December 31, 2025**

“Try Before You Commit” Program

To make experiencing the benefits of the BotX product line even easier, we are offering a "Try Before You Commit" rental program.

Start with a short-term rental.

If you decide to lease or purchase within the first 3 months, we'll credit 50% of your rental cost toward the agreement.

“White Glove” Service

In addition to savings, you'll also get personalized, white-glove service. That means a welding specialist from our network throughout North America comes to your site to provide hands-on installation and training at no extra cost — you don't have to watch videos to figure it out on your own.

Take Advantage of Section 179* Tax Savings

For US-based customers: The BotX XSR system may qualify for the IRS Section 179 deduction. This powerful tax incentive allows your business to deduct the full purchase price of qualifying equipment placed into service during the 2025 tax year.

*Please consult with your tax advisor to confirm eligibility for Section 179 and for specific tax advice.

Availability & Deadline

To qualify for the discount, a purchase order must be received by **Wednesday, December 31st, 2025**. Installations are scheduled upon PO receipt and completed in order.
